

Therm-A-Grille

Part of the Dixon
International Group Ltd
www.dig.co.uk

Application

THERM-A-GRILLE is suitable for vertical apertures in fire resisting doors and compartment walls.

The intumescent air transfer grille provides a flange for fixing which is 38mm thick to fit any 30 minute or 60 minute fire door. It is held in position by means of 50mm No.8 size steel screws (not supplied) through the unit's frame at 150mm centres.

THERM-A-GRILLE does not require any additional mastic sealant to its perimeter.

THERM-A-GRILLE is fitted centrally with the thickness of the fire resisting element.
